

## BENEFITS

- **Mix & Shoot Technology** – No inductions times
- **High Performance Formula** – Extremely water, chemical, solvent, and acid resistive
- **Easy to Use** – Designed for novice sprayers – Virtually no learning curve
- **High Solids Formula** – Builds and hides imperfections on vertical and horizontal surfaces
- **Super Fast Dry Times** – Can be recoated in minutes
- **Economical** – Extremely high coverage rates

# PRIME-X SYSTEM 100

## PRIME-X HIGH SOLIDS POLYAMIDE EPOXY PRIMER SYSTEM

Prime-X System 100 is a new generation of polyamide based epoxy primer for the professional refinisher that delivers exceptional coverage at an affordable price; making it an economical alternative to expensive marine and automotive epoxies.

Incredibly versatile, Prime-X can be used with both solvent based coatings, water based multi-colors, and as an intermediary primer between bonding agents and non-isocyanate coatings.

Fast drying formula perfect for priming bathtubs, ceramic tiles, laminates, cabinets, steel, fiberglass, aluminum, acrylic, porcelain, countertops, vinyl, wood, and cementitious surfaces.
